

↳ How to Install Extension

Once you placed the order you will receive link to download extension package in your email box.

You can also download extension package from your MyAccount > My Downloadable Products Section.

Step 1

Extract downloaded extension package in your magento root folder using FTP (File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app, bin, lib, phpserver and vendor etc.

Step 2

Next Need to run some magento commands to install extension in your system, so connect with your server via SSH and go to magento root folder (e.g : `cd /var/www/html/magento243`) and run below commands one by one.

- `php bin/magento setup:upgrade`
- `php bin/magento setup:static-content:deploy-f`
- `php bin/magento indexer:reindex`
- `php bin/magento cache:clean`
- `php bin/magento cache:flush`
- `chmod-R 777 var/ pub/ generated/`

Step 3

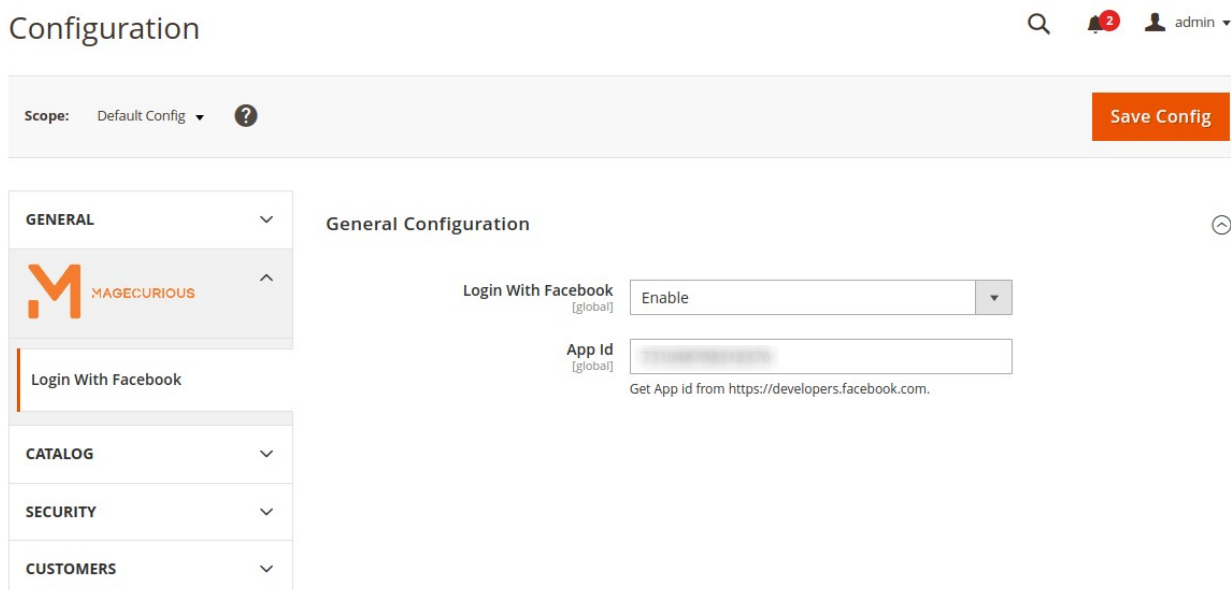

if your all commands run successfully than login to your system Admin Panel and goto Store > Configuration, if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

↳ How to Configure Extension

Step 1

To Configure Extension go to Stores > Configuration > MageCurious Tab > **Login With Facebook**

The screenshot shows the 'Configuration' page for the 'Login With Facebook' extension. At the top, there is a search icon, a notification bell with '2' alerts, and a user profile for 'admin'. Below this is a 'Scope' dropdown set to 'Default Config' and a 'Save Config' button. The left sidebar contains a menu with 'GENERAL' selected, 'MAGECURIOUS' logo, and 'Login With Facebook' highlighted. The main content area is titled 'General Configuration' and shows the 'Login With Facebook' [global] setting set to 'Enable' and the 'App Id' [global] field with a placeholder and a link to 'https://developers.facebook.com'.

Step 2

In General Configuration:

Enabled: Select Enable to enable the module.

App id: You need to create an app and generate app id from <https://developers.facebook.com>.

Follow this link to create app and generate id for login with facebook.

<https://developers.facebook.com/docs/development/create-an-app>

Here is a guid to how to create app for facebook login:

<https://developers.facebook.com/docs/facebook-login/web>
