

↳ **How to Install Extension**

Once you placed the order you will receive link to download extension package in your email box. You can also download extension package from your MyAccount > My Downloadable Products Section

Step 1

Extract downloaded extension package in your magento root folder using FTP(File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app,bin,lib,phpserver and vendor etc.

Step 2

Next Need to run some mageno commands to install extension in your system , so connect with your server via SSH and go to magento root folder (e.g : cd /var/www/html/magentp243) and run below commands one by one.

- php bin/magento setup:upgrade
- php bin/magento setup:static-content:deploy -f
- php bin/magento indexer:reindex
- php bin/magento cache:clean
- php bin/magento cache:flush
- chmod -R 777 var/ pub/ generated

Step 3

if your all commands run successfully than login to your system Admin Panel and goto Store > Configuration , if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

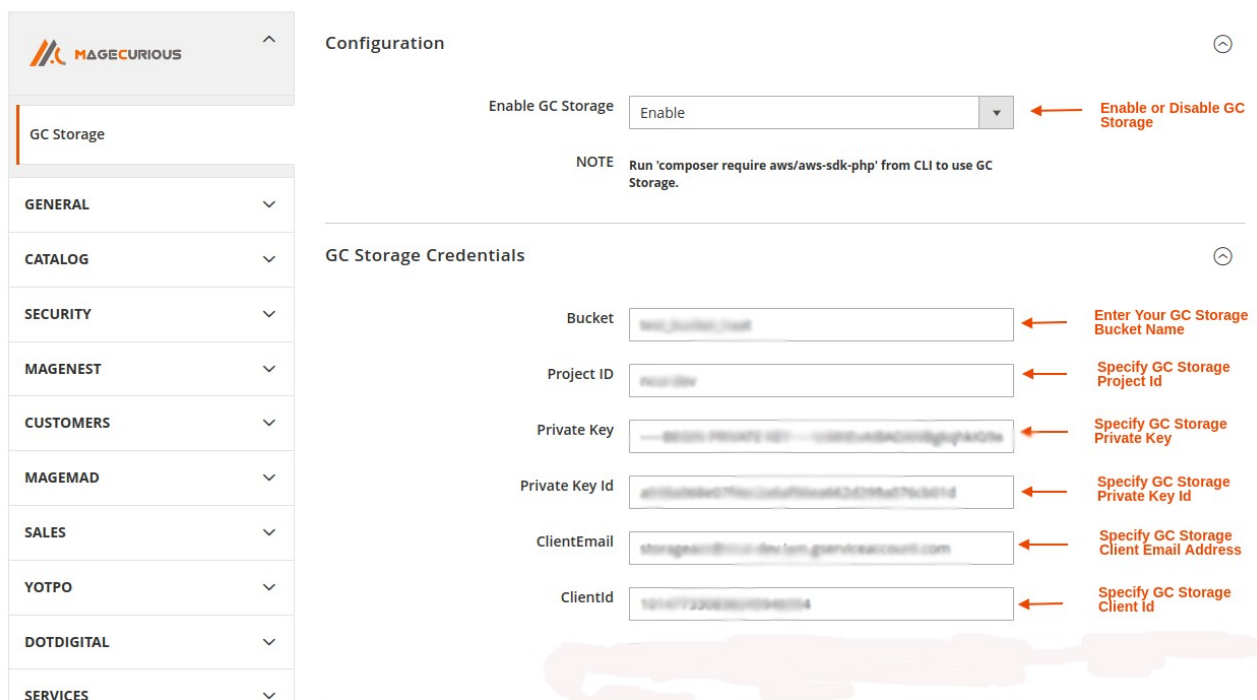

↳ How to Configure Extension

Step 1

Run below command in your magento root before configure extension.
composer require google/cloud-storage

To Configure Extension go to Stores > Configuration > MageCurious Tab > GC Storage

Step 2

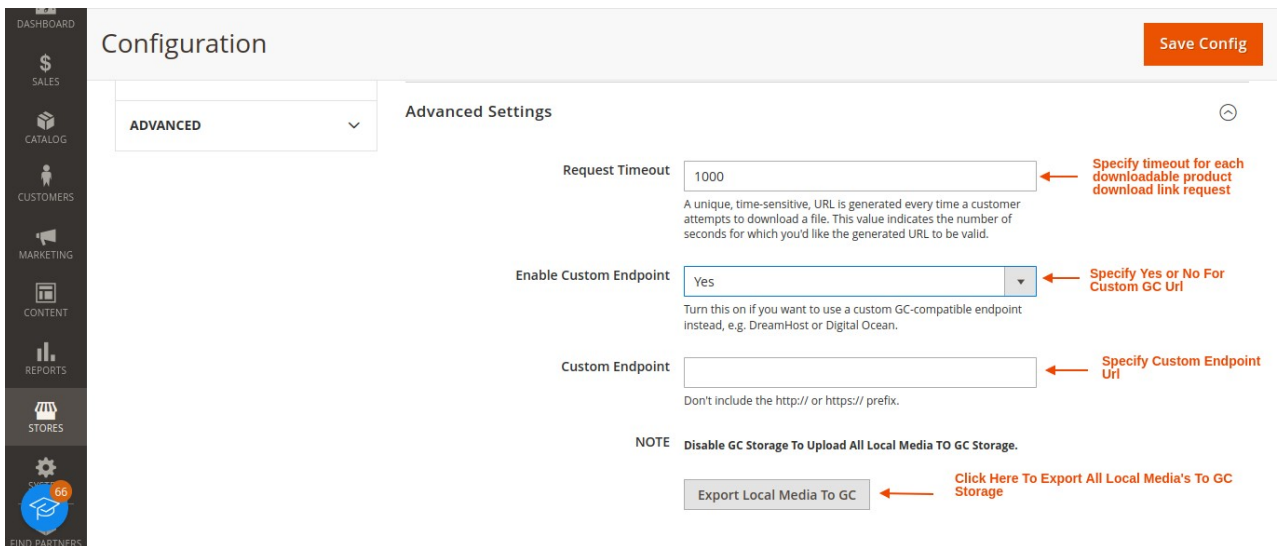

The screenshot shows the MageCurious Configuration page. On the left is a sidebar with a menu containing 'GC Storage', 'GENERAL', 'CATALOG', 'SECURITY', 'MAGENEST', 'CUSTOMERS', 'MAGEMAD', 'SALES', 'YOTPO', 'DOTDIGITAL', and 'SERVICES'. The main content area is titled 'Configuration' and contains the following settings:

- Enable GC Storage:** A dropdown menu set to 'Enable'. An arrow points to it with the text 'Enable or Disable GC Storage'.
- NOTE:** Run 'composer require aws/aws-sdk-php' from CLI to use GC Storage.
- GC Storage Credentials:** A section with several input fields, each with an arrow pointing to it and a label:
 - Bucket:** 'my_bucket_test' (Label: 'Enter Your GC Storage Bucket Name')
 - Project ID:** 'magento' (Label: 'Specify GC Storage Project Id')
 - Private Key:** A long alphanumeric string (Label: 'Specify GC Storage Private Key')
 - Private Key Id:** 'privatekeyid' (Label: 'Specify GC Storage Private Key Id')
 - ClientEmail:** 'storage@magento.com' (Label: 'Specify GC Storage Client Email Address')
 - Clientid:** '1234567890123456789012345678901234' (Label: 'Specify GC Storage Client Id')

- **Enable GC Storage:** Enable/Disable the GC Storage extension from here.
- **Bucket :** Enter GC bucket name to put and get media from GC Storage space.

- **Project ID** : Enter the Project ID to put and get media from GC Storage space.
- **Private Key** : Enter the Private key to put and get media from GC Storage space.
- **Private Key ID** : Enter the Private Key Id to put and get media from GC Storage space.
- **Client Email** : Enter the Client Email Address to put and get media from GC Storage space.
- **Client Id** : Enter the Client Id to put and get media from GC Storage space.
- **Region** : Select your GC Storage region from given drop-down.

Configuration Save Config

Advanced Settings

Request Timeout Specify timeout for each downloadable product download link request

A unique, time-sensitive, URL is generated every time a customer attempts to download a file. This value indicates the number of seconds for which you'd like the generated URL to be valid.

Enable Custom Endpoint Specify Yes or No For Custom GC Uri

Turn this on if you want to use a custom GC-compatible endpoint instead, e.g. DreamHost or Digital Ocean.

Custom Endpoint Specify Custom Endpoint Uri

Don't include the http:// or https:// prefix.

NOTE **Disable GC Storage To Upload All Local Media TO GC Storage.**

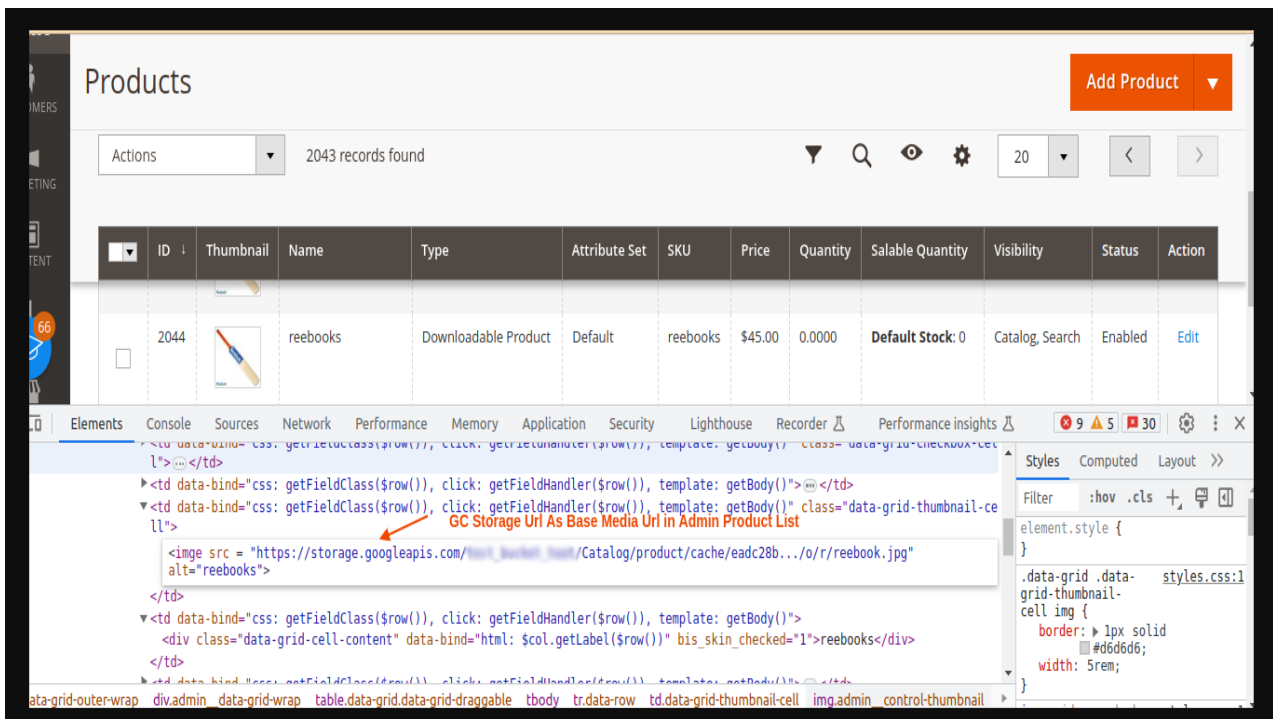

Click Here To Export All Local Media's To GC Storage

- **Request Timeout** : Set Request Timeout and this field will set downloadable product link url expiration time . Eg if you set 1000 than the downloadable product link url will expire after 1000 seconds . And you need to generate url again from My Account Section.
- **Enable Custom Endpoint** : Set it yes if you want to add or use custom endpoint url for your GC storage e.g : if you are using Digital Ocean Compatibility with GC than you can set it to yes and add custom end point in below here

- **Custom Endpoint** : Set your custom endpoint url for GC storage access here. This will only enable if you choose Enable Custom Endpoint To Yes.
- **Export Local Media To GC** : Click here to export your all local media's including images , pdf files etc. To GC Storage .
- **Make sure you have disable GC storage extension before export media from local storage.**

↳ Extension Features

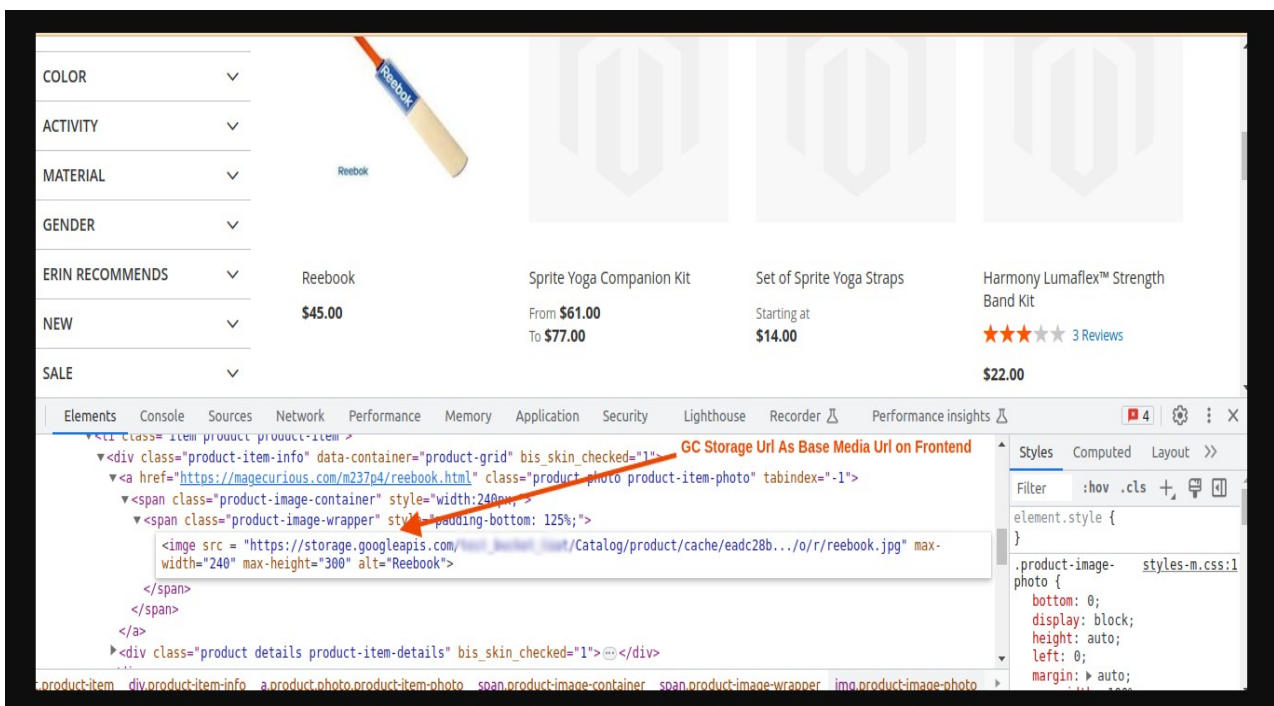

- **GC Storage Url At Admin Product List Page**

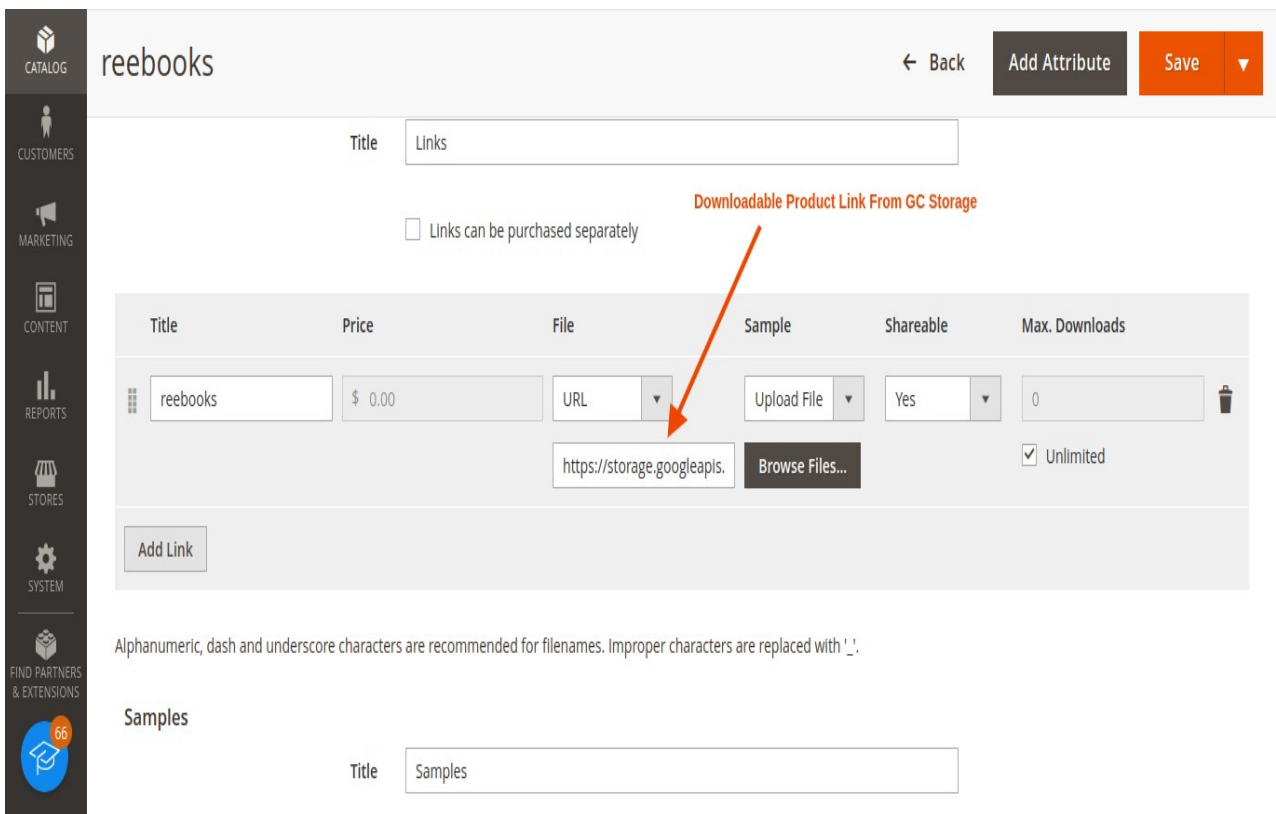

The screenshot shows the Magento Admin interface for the 'Products' section. A table lists products, with one row for 'reebooks' (ID: 2044). The browser's developer tools are open, showing the HTML for the thumbnail cell. The image source is highlighted as `https://storage.googleapis.com/magento-media-catalog-product-cache/eadc28b.../o/r/reebook.jpg`, with a red arrow pointing to it and the text 'GC Storage Url As Base Media Url in Admin Product List'.

ID	Thumbnail	Name	Type	Attribute Set	SKU	Price	Quantity	Salable Quantity	Visibility	Status	Action
2044		reebooks	Downloadable Product	Default	reebooks	\$45.00	0.0000	Default Stock: 0	Catalog, Search	Enabled	Edit

- **GC Storage Url At FrontEnd Product List Page**

- **GC Storage Url At Admin Downloadable Product Edit Page**

The screenshot shows the 'reebooks' product edit page in the admin interface. The left sidebar contains navigation icons for CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area has a breadcrumb 'reebooks' and navigation buttons: 'Back', 'Add Attribute', and 'Save'. The 'Title' field is set to 'Links'. Below it, there is a checkbox 'Links can be purchased separately' which is unchecked. A red arrow points to the 'File' dropdown menu, which is currently set to 'URL'. A red text label 'Downloadable Product Link From GC Storage' is positioned above the arrow. The 'File' dropdown is open, showing the URL 'https://storage.googleapis.' and a 'Browse Files...' button. The 'Sample' dropdown is set to 'Upload File'. The 'Shareable' dropdown is set to 'Yes'. The 'Max. Downloads' field is set to '0' with an 'Unlimited' checkbox checked. An 'Add Link' button is located below the table. A note at the bottom states: 'Alphanumeric, dash and underscore characters are recommended for filenames. Improper characters are replaced with '_'.

Title	Price	File	Sample	Shareable	Max. Downloads
reebooks	\$ 0.00	URL	Upload File	Yes	0
