

↳ How to Install Extension

Once you placed the order you will receive link to download extension package in your email box.

You can also download extension package from your MyAccount > My Downloadable Products Section.

Step 1

Extract downloaded extension package in your magento root folder using FTP(File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app,bin,lib,phpserver and vendor etc.

Step 2

Next Need to run some magento commands to install extension in your system , so connect with your server via SSH and go to magento root folder (e.g : cd /var/www/html/magento243) and run below commands one by one.

- php bin/magento setup:upgrade
- php bin/magento setup:static-content:deploy-f
- php bin/magento indexer:reindex
- php bin/magento cache:clean
- php bin/magento cache:flush
- chmod-R 777 var/ pub/ generated/

Step 3

If your all commands run successfully than login to your system Admin Panel and goto Store > Configuration, if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

About the Extension:

The **Product Options Price Comparison** extension for Magento 2 helps merchants display price differences for customizable product options in a clear and easy-to-understand manner, allowing customers to compare how different options affect the final product price. This extension ensures that the price variations for each option (such as size, color, or material) are visible and transparent, improving the shopping experience and helping customers make more informed purchasing decisions.

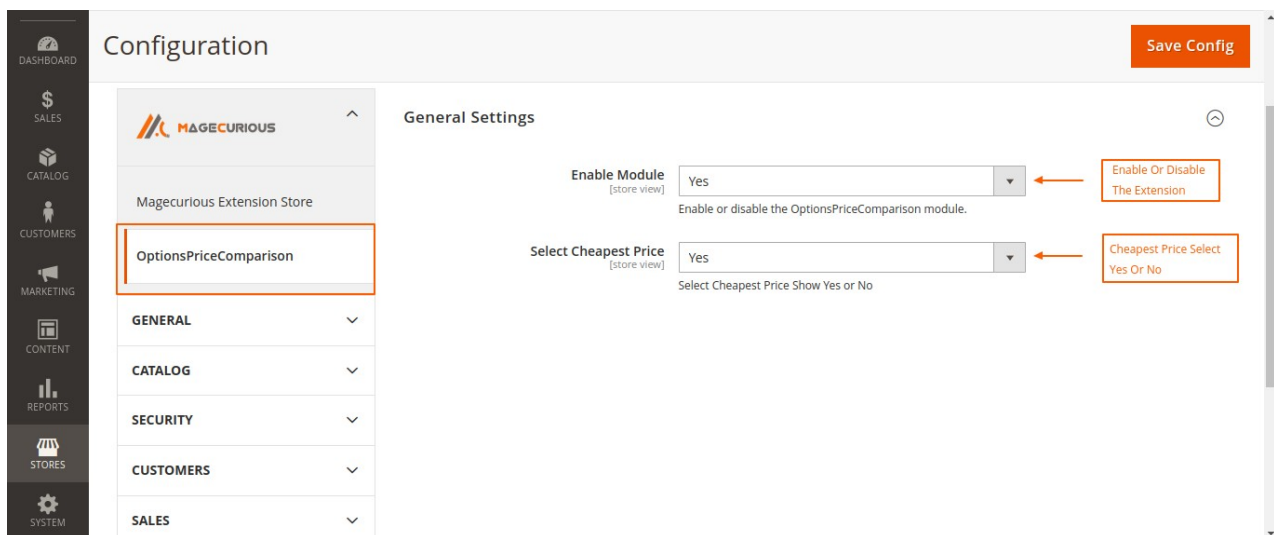

Features of Magento 2 Product Options Price Comparison Extension:

- **Clear Price Differences:** Displays the price difference for each product option (e.g., size, color, material), helping customers easily compare how different options affect the final price.
- **Customizable Option Display:** Allows merchants to choose how to display the price difference, whether as a percentage or an absolute value, based on the selected option.
- **Real-time Price Update:** Automatically updates the total price of the product in real time as customers select different options, providing immediate feedback on the price impact.
- **Improved Shopping Experience:** Helps customers make informed decisions by clearly showing the price impact of each customization option.
- **Supports Multiple Option Types:** Works seamlessly with various types of customizable options such as dropdowns, text fields, radio buttons, and checkboxes.
- **Increased Conversion Rates:** By providing clearer price information, it can lead to higher conversion rates and fewer abandoned carts, as customers are more confident in their purchase choices.

↳ How to Configure Extension

Step 1 : Configuration

To Configure Extension go to **Stores -> Settings -> Configuration -> Magecurious -> OptionsPriceComparison**

The screenshot displays the 'Configuration' page for the 'OptionsPriceComparison' extension. The left sidebar shows a navigation menu with categories like DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, and SYSTEM. The 'OptionsPriceComparison' extension is selected and highlighted. The main content area shows 'General Settings' for the extension. Two settings are visible: 'Enable Module' (store view) set to 'Yes' and 'Select Cheapest Price' (store view) set to 'Yes'. Red boxes and arrows highlight these settings, with labels 'Enable Or Disable The Extension' and 'Cheapest Price Select Yes Or No' respectively. A 'Save Config' button is located in the top right corner.

Enable: Enable or Disable the Product Options Price Comparison Module.

Select Cheapest Price: Selecte Cheapest Price Yes Or No

Step 2 : Configurable Product Price Difference

The configurable product price difference refers to the variation in price based on the options selected for a configurable product (e.g., size, color, material). Each configurable option can have a different price adjustment (either an increase or decrease) from the base price.

This difference is typically calculated based on the selected attributes and displayed on the product page to inform customers of the adjusted price for their chosen configuration.

Step 3 : Simple Product Customizable Options Price Difference

Simple Product Customizable Options allow customers to customize a product by selecting different options (like color, size, or engraving) during the purchasing process.

These options can have **price differences**, where each choice can either increase or decrease the product price based on the selected option.

The **price difference** for each option is added to or subtracted from the base price of the product, reflecting the customization's impact on the final price.

The screenshot displays the product page for the Redmi A21. The product name is "RedmiA21" with a price of "\$515.00". It is marked as "IN STOCK" with SKU# "RedmiA21". The page lists three customizable options: "color", "storage", and "RAM". Each option has a list of choices with associated price differences. A red box highlights the "Simple Product Customizable Options Price Difference Show" feature, with arrows pointing to the "Red" color option, the "256" storage option, and the "16GB" RAM option.

Option	Choice	Price Difference
color *	Black	-\$5.00
	White	-\$25.00
	Red	0.00
storage *	64	-\$80.00
	128	-\$50.00
	256	0.00
RAM *	4GB	-\$90.00
	8GB	-\$50.00
	16GB	0.00
