

↳ How to Install Extension

Once you placed the order you will receive link to download extension package in your email box.

You can also download extension package from your MyAccount > My Downloadable Products Section.

Step 1

Extract downloaded extension package in your magento root folder using FTP(File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app,bin,lib,phpserver and vendor etc.

Step 2

Next Need to run some magento commands to install extension in your system , so connect with your server via SSH and go to magento root folder (e.g : cd /var/www/html/magento243) and run below commands one by one.

- php bin/magento setup:upgrade
- php bin/magento setup:static-content:deploy-f
- php bin/magento indexer:reindex
- php bin/magento cache:clean
- php bin/magento cache:flush
- chmod-R 777 var/ pub/ generated/

Step 3

if your all commands run successfully than login to your system Admin Panel and goto Store > Configuration, if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

Extension Title : Unipass Payment Gateway

About the Extension:

The **Unipass Payment** extension for Magento 2 allows you to integrate the powerful and secure Unipass payment system into your online store. With a focus on frictionless transactions, Unipass supports multiple payment methods, including credit/debit cards, bank transfers, and more — ensuring a smooth checkout experience for your customers.

Magecurious unipaas solution Seamlessly integrates Unipaas Payment Gateway into your Magento 2 store.

This extension helps to improve shopping experience.

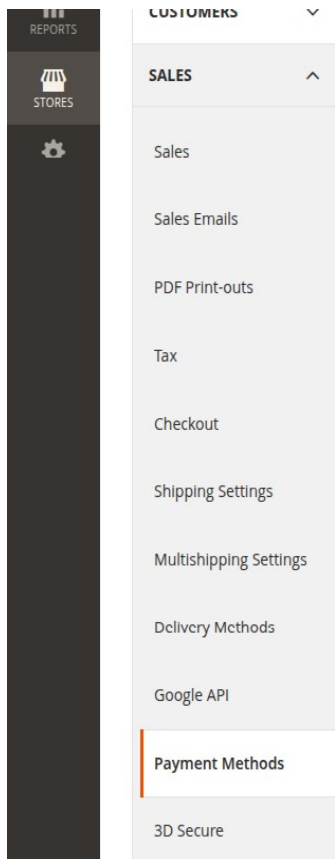

Features of Magento 2 Unipaas Payment Gateway Extension:

- The admin can enable or disable the module.
- Admin can configure Sandbox/Production environments for testing and live usage.
- Option to automatically generate invoice after successful payment.
- Handles payment authorization and refund via UniPaaS API.
- Compatible with multiple currencies — includes real-time currency conversion support.
- Supports redirect-based payment processing for secure and smooth transactions.
- UniPaaS supports receiving payments in the limited currencies (check our user guide for currency support) only but our module will **automatically convert the order amount** into your selected currency based on real-time exchange rates.

↳ How to Configure Extension

Step 1: Configuration

To Configure Extension go to **Stores -> Settings -> Configuration -> SALES -> Payment Method -> Other Payment Methods -> Unipaas Payment Gateway**

Unipaas Payment Gateway

Enabled [website]	Yes	← Enable or Disable Module
Public Key [website]	← Public key From Unipaas Website
You can get this key from your Unipaas Key Page .		
Private Key [website]	← Private Key From Unipaas Website
You can get this key from your Unipaas Key Page .		
Currency [store view]	USD	← Currency which you want to accept
Environment [store view]	Sandbox	← Select Sandbox or Production
Select Sandbox or Production environment		
Order Status [store view]	Pending	← Order Status Before Payment Successful
Before Payment Order Status		
Auto Generate Invoice After Payment [store view]	No	← Automatic Generate Invoice
Exchange Rate API Key [website]		← Exchange Rate API Key
You can get this key from your Exchange Rate Key Page .		

Step 1: Configuration:

Unipaas Payment Gateway: Enable or Disable the Unipaas Payment Gateway Module.

Public Key: Set the Public Key from Unipaas Official Portal.

Private Key: Set the Private Key from Unipaas Official Portal.

You can get the key from <https://portal.unipaas.com.developers/keys>

Currency:

UniPaaS supports receiving payments in the following four currencies only:

- **GBP** (British Pound Sterling)
- **USD** (United States Dollar)
- **EUR** (Euro)
- **CAD** (Canadian Dollar)

Our module will **automatically convert the order amount** into your selected currency based on real-time exchange rates.

You will **receive the payment in the selected currency**, regardless of the original order currency.

Environment:

Selecting **Sandbox** will enable **Test Mode**, which is used for development and testing purposes with test credentials.

Selecting **Production** will enable **Live Mode**, and real transactions will be processed using live UniPaaS credentials.

Order Status:

The selected **Order Status** will be automatically applied **before the payment is confirmed** by UniPaaS.

This status is useful for identifying and managing orders that are pending payment verification.

Auto Generate Invoice After Payment:

Enable this option to **automatically generate an invoice** once the payment is successfully confirmed by UniPaaS.

If disabled, the order status will remain as configured (e.g., "Pending") and invoicing must be done manually from the admin panel.

This feature helps streamline order processing by reducing manual steps after a successful transaction.

Exchange Rate API Key:

Enter your ExchangeRate-API Key to enable automatic currency conversion when a customer's order currency differs from your selected UniPaaS payment currency (GBP, USD, EUR, CAD).

If left empty, the module will use a default API key provided in the code (not recommended for production use).

You can get your own API key from <https://www.exchangerate-api.com> for more reliable and secure usage.

Step 2: Enable Unipaas Payment to Design the Product

To Enable the Unipaas Payment Gateway you must enable the Enabled Field to **Yes**.

⌵ Unipaas Payment Gateway

Enabled <small>[website]</small>	<input type="text" value="Yes"/>	⌵	← Enable or Disable Module
.....	<input type="text"/>		

Step 3: Get API Keys from Unipaas Official Portal

Go to Unipaas official portal(<https://portal.unipaas.com.developers/keys>) and get your public key and private from Developers -> API Keys

API Keys

Sandbox

Public Key	<input type="text" value="20MEV800H00W0001200Q"/>	<input type="button" value="copy"/>
Private Key	<input type="text" value="....."/>	<input type="button" value="copy"/>

Production

Step 4: Add Your Keys to Config

To Add your Public and Private Keys to the configuration.

Unipaas Payment Gateway

Enabled [website] Yes
