

↳ How to Install Extension

Once you placed the order you will receive link to download extension package in your email box.

You can also download extension package from your MyAccount > My Downloadable Products Section.

Step 1

Extract downloaded extension package in your magento root folder using FTP(File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app,bin,lib,phpserver and vendor etc.

Step 2

Next Need to run some magento commands to install extension in your system , so connect with your server via SSH and go to magento root folder (e.g : cd /var/www/html/magento243) and run below commands one by one.

- php bin/magento setup:upgrade
- php bin/magento setup:static-content:deploy-f
- php bin/magento indexer:reindex
- php bin/magento cache:clean
- php bin/magento cache:flush
- chmod-R 777 var/ pub/ generated/

Step 3

if your all commands run successfully than login to your system Admin Panel and goto Store > Configuration, if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

Extension Title : Canada Post Shipping

About the Extension:

Magecurious Canada Post Shipping Extension provides seamless integration of Canada Post shipping services into your Magento 2 store. It enables Real-time shipping rate calculation based on destination, weight, and dimensions.

Compatible with multiple currencies — includes real-time currency conversion support. Supports multiple shipping methods including standard and expedited options. Generates shipping labels, tracks parcels, and improves order fulfillment.

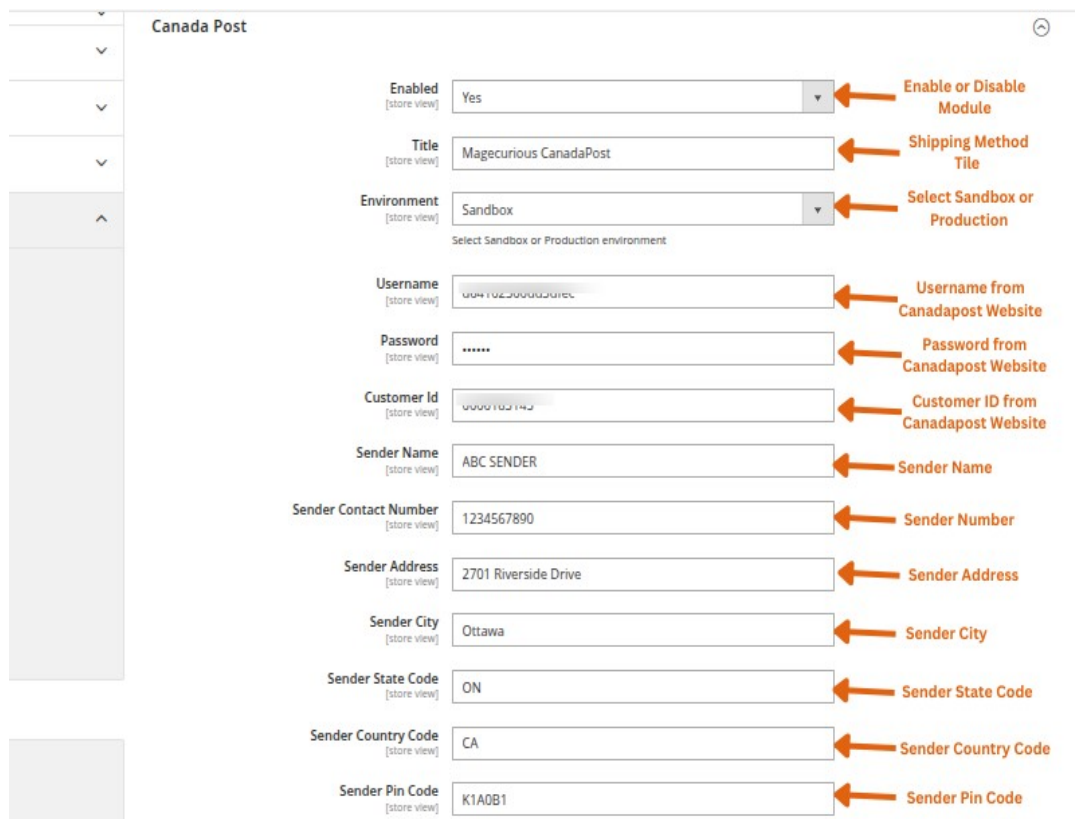

Features of Magento 2 Canadapost Shipping Extension:

- The admin can enable or disable the Canada Post shipping method from the backend.
- Supports configuration for Sandbox and Production environments for testing and live shipments.
- Provides real-time shipping rates based on destination, package weight, and dimensions.
- Automatically generates shipping labels through the Canada Post API.
- Print labels directly from Magento Admin
- Fully compatible with Magento 2 order and shipment workflows.
