

↳ How to Install Extension

Once you placed the order you will receive link to download extension package in your email box.

You can also download extension package from your MyAccount > My Downloadable Products Section.

Step 1

Extract downloaded extension package in your magento root folder using FTP (File Transfer Protocol) Tools. For verification of root folder you can see some folders inside magento root folder like app, bin, lib, phpserver and vendor etc.

Step 2

Next Need to run some magento commands to install extension in your system, so connect with your server via SSH and go to magento root folder (e.g : cd /var/www/html/magento243) and run below commands one by one.

- php bin/magento setup:upgrade
- php bin/magento setup:static-content:deploy-f
- php bin/magento indexer:reindex
- php bin/magento cache:clean
- php bin/magento cache:flush
- chmod-R 777 var/ pub/ generated/

Step 3

If your all commands run successfully than login to your system Admin Panel and goto Store > Configuration, if you will see new Tab in left side bar with MageCurious Logo it means extension installed successfully.

Hey !! You Installed Extension Successfully Now it's time to Configure Extension.

About the Extension:

The **Magento 2 Store Credit Wallet Extension** empowers merchants to offer a seamless digital wallet experience to their customers. This extension enables customers to top up their store credit balance, use it for future purchases, and share credits with friends via email or QR code. It also facilitates automated refunds in the form of store credit, thereby reducing payment gateway charges and improving customer retention.

Whether it's offering a better refund process or enhancing customer loyalty through flexible store credit sharing, this extension adds both convenience and engagement to your Magento store.

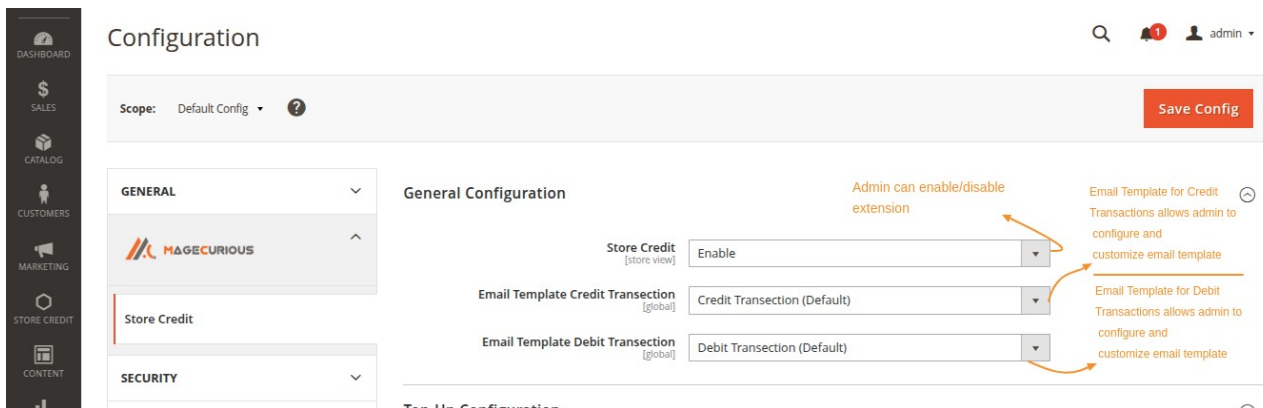

Features of Magento 2 Store Credit Wallet Extension:

- Enable or disable the extension from the admin panel.
- **Top-Up Wallet:** Allow customers to top-up their wallet balance directly from the frontend.
- **Automatic Refund to Wallet:** Full order refund as store credit when a credit memo is generated.
- **Wallet Payments:** Customers can use their wallet balance during checkout.
- **Order Cancellation:** Automatically restores used wallet balance when the customer cancels an order.
- **Share Wallet via Email:** Customers can send wallet credit to friends through email.
- **Receive Credit via QR Code:** Enables customers to receive credits via QR code scan.
- **Admin Grid for Wallet Balance:** Admins can view all customer wallet balances.
- **Admin Grid for Transactions:** Track complete wallet transaction history from the admin panel.

↳ How to Configure Extension

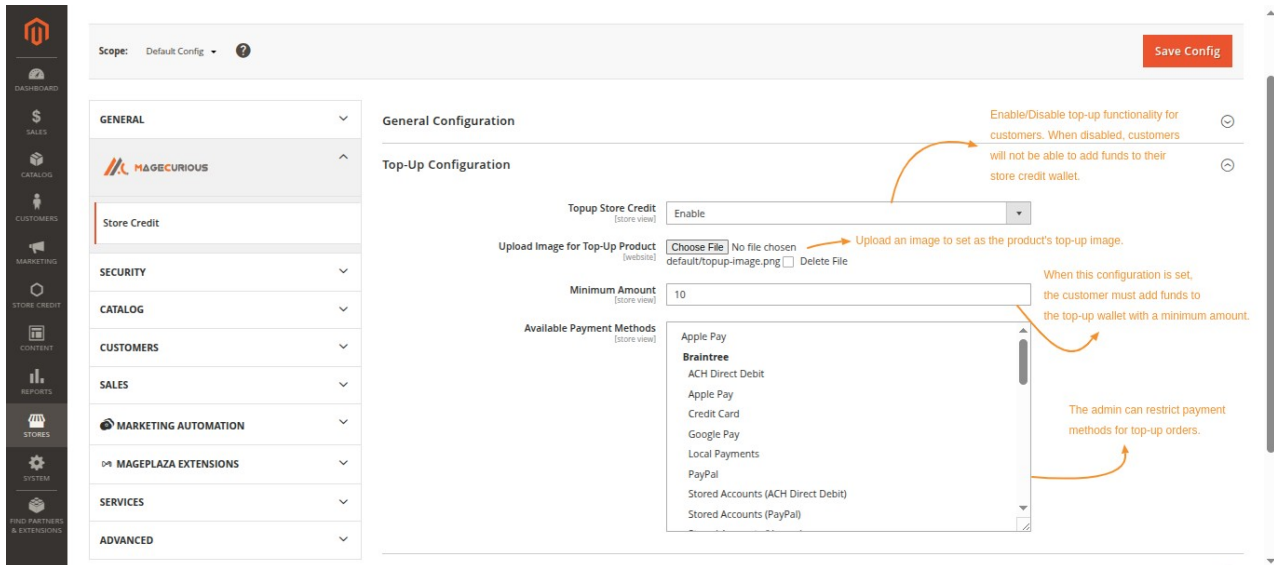

Step 1 : Configuration

To Configure Extension go to **Stores -> Settings -> Configuration -> Magecurious -> Store Credit**

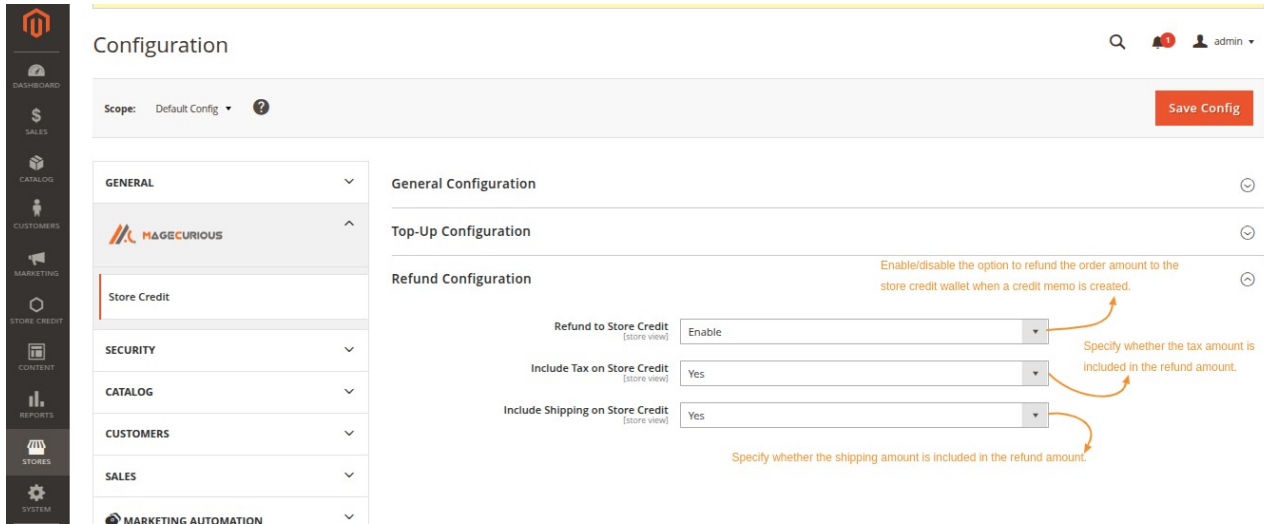

General Configuration

- **Store Credit:** Globally enable or disable the store credit wallet functionality.
- **Email Template Credit Transaction:** Select the email template for credit (top-up, refund) notifications.
- **Email Template Debit Transaction:** Select the email template for debit (order, transfer) notifications.

Top-Up Configuration

- **Topup Store Credit:** Allow or restrict customers from topping up wallet credits.
- **Upload Image for Top-Up Product:** Upload an image representing the wallet top-up product on the frontend.
- **Minimum Amount:** Define the minimum amount a customer can add to their wallet.
- **Available Payment Methods:** Choose the payment methods that customers can use to top-up their wallet.

Refund Configuration

- **Refund to Store Credit:** Automatically credit the customer's wallet on generating a credit memo.
- **Include Tax on Store Credit:** Decide if tax should be included in the refund amount.
- **Include Shipping on Store Credit:** Decide if shipping charges should be included in the wallet refund.

	#17 30 Apr, 2025	
+	Store credit of \$180.00 used in order #00000015 has been refunded to your wallet due to order refund	\$180.00

Customers can send store credit wallet amounts to their friends using an email address.

Customers can receive store credit directly to their wallet via a QR code generated by the sender. To generate the QR code, the sender inputs the desired credit amount into the input field, which then creates a scannable QR code. This code can be shared with the recipient, who scans it using their mobile device camera to transfer the specified store credit to the recipient's wallet.
